Figure 1: Frequencies for Conviviality, Identity and Threat items **Convivality** Interaction anxiety with 43.4% 5.4% [PER/VEN]. 3.3% 15.9% 32.0% Neither comfortable nor uncomfortable Very uncomfortable Uncomfortable Comfortable Very comfortable 11.7% Sympathy for [PER/VEN] living 30.7% in Chile 16.9% 33.1% 7.6% Somewhat Quite a lot Very little or not at all A little A lot 41.5% 37.8% 6.9% Family value of migrant 9.6% friends [PER/VEN] 4.2% 41.9% 6.0% Friends value of migrant 9.7% friends [PER/VEN] 38.2% 4.2% Migrants [PER/VEN] have 2.6% 21.9% Chilean friends 12.2% 0.9% 62.4% Strongly disagree Disagree Neither disagree nor agree Agree Strongly agree **Identity** 24.6% 27.8% 15.9% Similarity between Chileans and [PER/VEN] 26.9% Not similiar Slightly similar Somewhat similar Quite similar Very similar 9.8% 38.2% 29.8% Loose of identity because of 7.7% migrants 14.5% 8.1% 60.7% 17.1% Migrant keeping their customs-1.6% 12.5% 8.2% 15.8% 13.3% Adoption of Chilean customs-1.7% 60.9% Strongly disagree Disagree Neither disagree nor agree Agree Strongly agree **Threat** 7.0% 12.0% Threat (Unemployment increases) 39.5% 11.7% 29.8%

Strongly disagree

Disagree

Note: Own elaboration based on ELSOC Survey (n=6344). Distribution of responses for each item regarding the variables Conviviality, Identity and Threat. The vertical black line is the threshold between negative (left) and positive (right) attitudes towards migration. [PER/VEN] represent Peruvians and Venezuelans, the different target groups included in each statement.
